Response to Amendment

1. The indicated allowability of claims 19, 30-31 is withdrawn in view of the reference(s) to Endelman. Rejections based on the newly cited reference(s) follow.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "62" has been used to designate both anchor bar and a pin. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

a. Claims 19, 30-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Endelman '425 and further in view of Endelman. Endelman

Art Unit: 3764

discloses all of the limitations of the claimed invention except for the wheel attached to the anchor bar. Thus Endelman teaches a wheel attached to a bar for guidance inside a track. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Endelman in view of Endelman such that a wheel is used as a guide means inside a track.
